

# STORY OF ONESIGHT

30 years ago, we began as an experiment - just a few people who decided to donate 25 pairs of glasses to disadvantaged kids and complete the whole process from eye exam to fitting within a few hours.

*The experiment worked.*

On that day, hopeful moms came through the door with kids who had never seen clearly and left in grateful tears. Kids' eyes suddenly opened wide as they took in the world with a new perspective.

## OUR VISION

A world where access to vision care is no longer a barrier to human achievement and possibility.

## OUR CHALLENGE

**1 in 7 people worldwide need glasses,** but have no way to get them. That's 1.1 billion people. All age groups and geographies are affected.

## OUR SOLUTIONS

### SHORT-TERM SOLUTIONS

#### Charitable Clinics

OneSight leads weeklong vision care clinics where volunteers hand-deliver much needed free eye care and eyewear through temporary clinics and mobile vision vans globally and regionally.

### LONG-TERM SOLUTIONS

#### Sustainable Centers

OneSight has pioneered the development of sustainable vision-care models that provide permanent access to affordable, high-quality vision care to millions in need through community and school-based models. These locally-led initiatives are long-term investments - permanent clinics for those who lack access to affordable, quality care.

## FAST FACTS

### **27+ MILLION LIVES SERVED**

This number refers to the people who have been directly served by OneSight's programming over the past 30 years, through Charitable Clinics and Sustainable Vision Centers.

### **22+ MILLION PEOPLE WITH ACCESS**

This number refers to the total number of people who can now receive vision care as they need it on an ongoing basis as of the end of 2018.

### **131,979 GLASSES DISPENSED IN 2018**

This refers to the number of glasses that were given to OneSight patients across Charitable and Sustainable programming in 2018.
