OneSight is an independent nonprofit and registered 501(c)(3) committed to empowering others through clear sight, and achieving a world where access to vision care is no longer a barrier to human achievement.

Through our work providing access to quality vision care and eyewear in underserved communities worldwide, we help fuel people’s potential by helping them see clearly.

Since 1988, OneSight has partnered with local health organizations, governments, school districts, industry leaders, doctors and volunteers to help more than 10 million people in 53 countries.
SUSTAINABLE PROGRAMMING
In 2018 OneSight continued expanding, refining and honing the sustainable approach to include access for more than 22 million people in Africa, India, China, East Timor and the United States.

CHARITABLE PROGRAMMING
OneSight held 152 local, regional, and global clinics that provided free vision care for those in need across 5 continents including Africa, South America, Southeast Asia, Australia, and North America.

NEW HORIZONS, NEW APPROACHES
- The Amazon River Basin is home to some extremely remote indigenous communities where residents would have to travel days to receive vision care. So we brought the eye care to them, by boat. Our first clinic-by-boat helped over 2,000 people see clearly, and we will be returning in 2019 with expanded surgical capabilities.

- Thailand is currently housing nearly 2 million displaced people seeking refuge from the ongoing instability in Myanmar in temporary shelters all along the border between the two countries. OneSight began a three-year initiative to bring access to 200,000 people through a combination of charitable clinics and training to create a long-term solution for this population.

*In 2018, OneSight deliberately slowed the expansion of sustainable vision centers in order to focus on deeper training of and skill transition to our governmental partners. Expansion of vision centers has resumed in 2019 in conjunction with a simultaneous approach to training and skill transitioning. This has resulted in a correspondingly higher proportion of spending in programming.
