

# MEET KEIRA

## KEIRA

USA | 8 YRS

Like many young girls, Keira loves to participate in gymnastics, riding her bike, playing with her friends and reading and writing at school. However, her participation in these activities was hindered by her blurry vision.

That all changed when she attended a OneSight clinic and received her first pair of glasses.

Now, she's able to do back flips and front flips, ride her bike with no hands (despite her mom's objections), and her teachers have commented on how her reading and writing skills have greatly improved.

8 years old and ready to take on the world, Keira is a little fireball of energy and enthusiasm.

*With exuberance, Keira could have read and drawn all day. Her joy can not be contained.*
