Matt's Story of Sight

Matt is 6 and without glasses he can't see far. At all. Maybe 2 feet, and then everything is blurry. And that was his whole world for the first 5 years of his life. He got his first pair last year from a Kansas City charitable vision clinic. The team even made his stuffed animal CatCat a pair! His teacher told us, "Matt used to never speak. I mean, at all. After he got his glasses last year, we've seen such a huge difference in him. He is open and eager to learn now. He is still slowly learning to share his thoughts. I'm sure it'll take some time as he's basically been blind his whole life. These glasses are a gift to Matt and other kids like him who wouldn't be able to afford them."
