

2021 ANNUAL REPORT

OneSight is a nonprofit and registered 501 (c) (3) committed to empowering others through clear sight and achieving a world where access to vision care is no longer a barrier to human achievement and potential. Through our work providing access to quality vision care and eyewear in underserved communities worldwide, we help fuel people's potential by helping them see clearly. Since 1988, OneSight has partnered with local health organizations, governments, school districts, industry leaders, doctors and volunteers to help more than 10 million people in 53 countries. In addition, we provide long-term access through permanent vision centers to more than 46 million people.

RETURNING TO PURPOSE

2021 was a year of resilience for OneSight and the whole world. In the face of an ongoing pandemic, OneSight was able to expand our work beyond what we did in 2020 and continue our mission to close the vision care gap through charitable and sustainable programming, thanks to the support of our founding sponsor, EssilorLuxottica.

So many people all over the world had their lives disrupted, and it was more important than ever for OneSight to help those in need. Additionally, we were able to support the passage of the first ever United Nations Resolution on vision for everyone globally.

We look forward to continuing the expansion of our work to pre-pandemic levels as conditions continue to improve.

LONG-TERM VISION CENTERS

OneSight's long-term programming involves partnering with countries to help them establish their own sustainable vision care system. In this way, we can provide scalable, affordable solutions that match the differing needs of countries and communities all over the world.

ZAMBIA

OneSight began our partnership with Zambia in 2017 to create a network of vision centers that would cover the needs of the whole country. In 2021 we were able to continue our work there, opening 10 vision centers (with a total of 48 vision centers built to date), allowing us to stay on-track with our roadmap to completion by 2022.

CHINA

One of our longest-standing sustainable partners, SmartFocus, continued to expand the number of vision centers serving patients in rural China. In 2021 we helped to create 6 new vision centers, bringing the total to 34 vision centers.

LIBERIA

Working in close partnership with leading NGOs Sightsavers and LV Prasad, we completed the opening of two additional vision centers in Liberia.

Patient Spotlight

"If I can't see the board, how will I know what to write on my paper?"

We couldn't have said it any better. Chance understands how important it is to be able to see in the classroom, and like many other 7th graders he has his sights set on big dreams. He wants to be a pilot and visit Japan when he grows up. We hope these glasses will help him to realize those dreams.

Chance, Age 12

SHORT-TERM VISION CLINICS

OneSight's short-term programming is specifically designed to provide vision care for those in need who live in areas where vision care is out of reach financially or physically. These temporary vision clinics offer free eye exams and glasses to low-income, underserved, and marginalized populations.

INDIGENOUS ENGAGEMENT

For indigenous people the world over, vision care can be hard to access or non-existent. OneSight has a long history of working with service organizations in multiple countries to help them get the care they need. In 2021, we were able to serve these communities in:

- Australia & New Zealand
- The United States

SCHOOL-AGED CHILDREN

Students are among the most vulnerable when it comes to lack of access to corrective vision. Not being able to see properly in classrooms means students risk falling behind or being misidentified as having a learning disability. The earlier we are able to catch and correct their vision problems, the greater the chance that they will be able to learn to their full potential. This year marked the first time of partnership with Oakley, conducting 5 clinics with their roster of professional athletes that they sponsor with a special focus on helping school-aged children get the glasses they need to succeed in school.

- The United States
- Australia & New Zealand
- South Africa

Volunteer Spotlight

"As OneSight Global Ambassadors, we partner with an amazing OneSight staff, and we are able to participate in four different OneSight key moments each year. This partnership ensures we are completely set up for success, and we are fully equipped to make the biggest impact. In addition, we are empowered to help with all of the in-between moments, including educating others on why exams are important, to ensure the best vision care. I am so proud to have been a OneSight Global Ambassador this year and I strongly believe that in my community, one person who is unable to see is one person too many."

Caryn Yager, LensCrafters Store Market Manager & OneSight Global Ambassador

UN RESOLUTION

2021 was an important year for vision care and eye health. In November, the United Nations General Assembly adopted the ‘Vision for Everyone; accelerating action to achieve the Sustainable Development Goals’ Resolution committing the international community to eye health for people living with preventable sight loss by 2030.

OneSight is a member of the UN Friends of Vision secretariat, a coalition of NGOs coordinated through the International Agency for the Prevention of Blindness, which helped to draft and shepherd the resolution through the ratification process in the United Nations.

The resolution was passed unanimously by all 193 countries of the United Nations. It sets a target for vision for everyone by 2030, with countries set to ensure full access to eye care services for their populations, and to make eye health integral to their nation’s commitment to achieving the Sustainable Development Goals.

The resolution also calls for new targets on eye care to be included in the UN’s Sustainable Development Goals at its next review. Finally, the resolution asks for international financial institutions and donors to provide targeted finances, especially to support developing countries in tackling preventable sight loss and requests the UN to incorporate eye health into its work, including through UNICEF and UN-Women.

To celebrate the ratification of this resolution, OneSight conducted two vision screenings on World Sight Day in New York City, including at the United Nations headquarters to help raise awareness of the need worldwide for those who lack access to vision care.
